5th National Climate Change Conference

In celebration of the Global Warming and Climate Change Consciousness Week
Theme: *Reinforcing the Youth's Role in Stewardship of Biodiversity for Climate Stability*

I. Rationale

Biodiversity is fundamental to sustaining life as it supplies critical ecosystem services such as food provisioning, water purification, flood and drought control, nutrient cycling, and climate regulation. These services are essential to support human well-being and economic growth.¹ Yet despite its significance to economy, society, health and cultural systems, biodiversity worldwide is being destroyed at an unprecedented and accelerating rate.^{2,3}

According to a recent study, climate change is projected to negatively impact 273 biodiversity-rich areas across the globe.⁴ Moreover, in the Asia-Pacific region, population of large wild mammals and birds has declined due to habitat degradation and fragmentation, and illegal trades. Invasive alien species, which is considered to be one of the most serious threats to biodiversity, has increased in number and abundance as a consequence of growing volume of international trade, transportation improvements, and cross-border migration. Additionally, human-induced drivers such as agriculture intensification and a shift to monoculture, overfishing, pollution, infrastructure development, and land use conversions, as well as indirect socioeconomic and demographic changes create further stress to biodiversity threatening its survival.^{5,6}

Philippines is considered as one of the 17 megadiverse countries worldwide. However, it is also known as one of the “hotspot areas” where biodiversity is under tremendous threat of total destruction.⁷ Recognizing the role of knowledge and capacity building in biodiversity conservation, the

Department of Education (DepEd) is mandated to provide and inculcate environmental consciousness among learners and personnel.

“We, in the Department of Education, hold the responsibility to equip more learners with the appropriate learning and thinking skills that will enable them to become agents of change and advocates of Biodiversity. Grounded on our core values—*Maka-Diyos, Makatao, Makakalikasan, at Makabansa*, we remain committed to ensuring that our learners will grow into individuals who deeply care about the environment and ready to partake in its restoration,” said Secretary Leonor Magtolis Briones.

This is reaffirmed by Novie Kate Arellana, a B’laan Grade 6 pupil from Ladol Elementary School, Schools Division Office of Sarangani, who said that *“dapat tayong (fellow children) magkaroon ng kamalayan sa ating kapaligiran at dapat tayong magtulongan na mapabuti ang ating kinabukasan. Hindi dapat natin iniisip na bata pa tayo, dahil hindi naman basehan ang edad sa pagiging isang responsableng mamamayan.”*

With this year’s theme *Reinforcing the Youth’s Role in Stewardship of Biodiversity for Climate Stability*, the 5th National Climate Change Conference (NCCC) celebration aims to provide a platform to elevate discussions, strategize participatory and concrete actions that can be done to create meaningful change, and help the learners, personnel, and their families gain a deeper appreciation and awareness of the country’s vast biodiversity.

The Conference will be streamed through the DepEd Philippines Facebook page, making it accessible to learners, DepEd personnel, and the public all over the country. This will focus on the role of biodiversity to climate stability; thus, we will have a virtual field trip to the Danjungan Island to be conducted by Philippine Reef and Rainforest Conservation Foundation. Further, we will feature different youth advocates, and climate change and biodiversity experts as they discuss the relation between the two topics. Finally, the Conference will provide a platform for learners to voice out their demands for climate action and feature their pro-active response to the changing climate.

The participants of the *Green Beat Initiative (TGBI): An Online Environmental Journalism Training for Campus Journalists and School Paper Advisers* and *KaLIKHAsan! Likha at Lakas ng Kabataan para sa Kalikasan: An Online Theater Production and Climate Action Training* will showcase their skills, while increasing the awareness of climate change among their fellow learners on the conference. Also, we have invited the trained environmental journalists in TGBI 2020 to feature and cover the event. Providing a platform to reinforce the role of youth in stewardship of biodiversity plays a crucial role in increasing youth participation in climate action.

II. Objectives

General Objectives:

- Strengthen awareness of the role of biodiversity in climate stability among the education stakeholders; and
- increase participation of learners and DepEd personnel in climate change adaptation and mitigation interventions.

Specific Objectives:

- discuss the link of biodiversity and climate stability;
- discuss the role of youth on stewardship of biodiversity for climate stability;
- provide a platform for showcasing innovations on climate change adaptation and mitigation; and
- facilitate discourse and collaboration among learners, industries, social entrepreneurs, academe, civil society, and other stakeholders.
